The screenshot displays the console output of a Java application running in an IDE. The application performs a Huffman tree construction and file compression. The output is as follows:

```
/home/zayton/.jdk/openjdk-17.0.1/bin/java -javaagent:/snap/intellij-idea-educational/42/lib/idea_rt.jar=36077:/snap/intellij-idea-educational/42/bin -Dfile.encoding=UTF-8 -classpath /media/zayton/W...

[8:30:22]: Compression ratio: 37.97752277749659

Process finished with exit code 0
```

Below the main console output, there is a 'Run' tab labeled 'Main (1)' which shows the command used to run the application and the output of the first two steps:

```
